Project Title: Space Escape — A Pygame Project.

Course Name: Programming in Python.

Submitted By: Md Rakibul Islam (24-59243-3)

Game Name: Space Escape

Environment Setup:-

- **Create venv:** `python -m venv venv`
- **Activate venv:** `venv\Scripts\activate`
- **Install Packages:** `pip install pygame`
- **Run Project:** `python main.py`
- **Generate Requirements:** `pip freeze > requirements.txt`

Key Feature:-

- **OOP Structure:** Organized With 4 classes (**Player, Enemy, GameEngine,** and **DataManager**) to keep the code clean and easy understanding.
- **Save System:** High scores are saved in a **game_data.json** file.
- **Pause Feature:** Players can easily pause or resume the game by pressing the **'P'** key during gameplay.
- **Game Over Screen:** A clear screen shows the **Final Score** when the player hits an enemy.
- **Environment Setup:** using **venv** to manage all libraries correctly.

Demo Proff:-

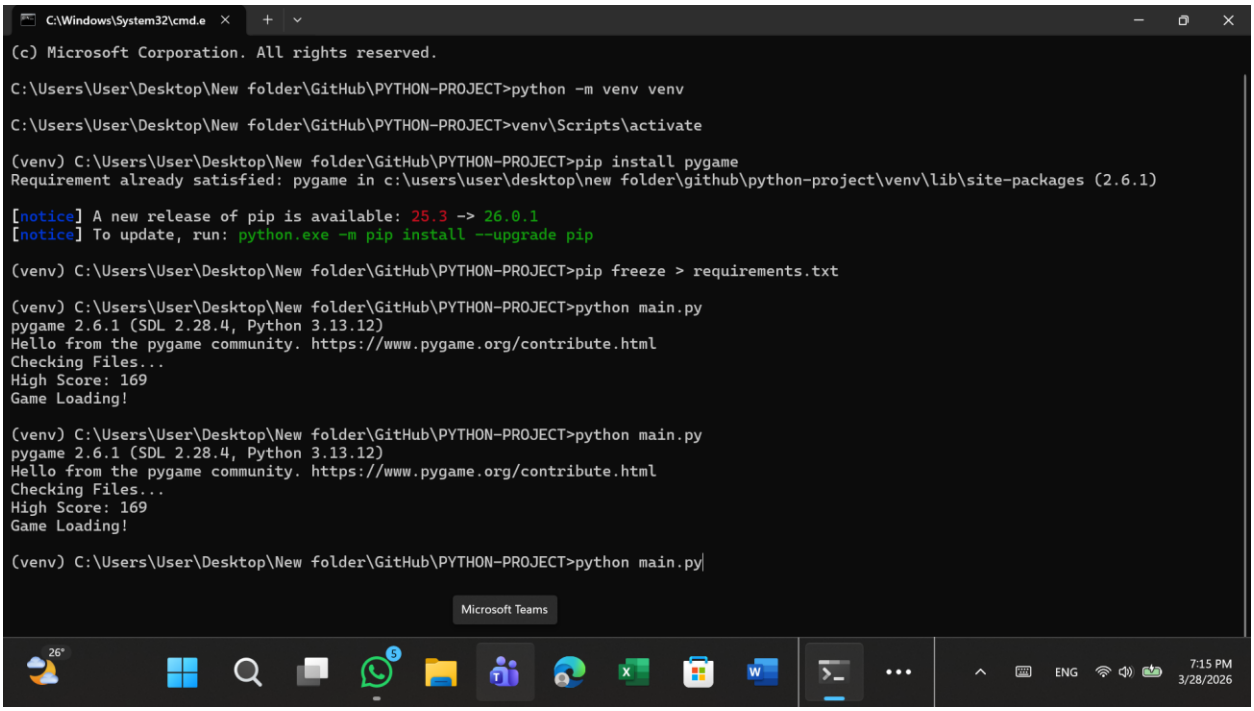

Figure 1: Showing venv activation and successful run

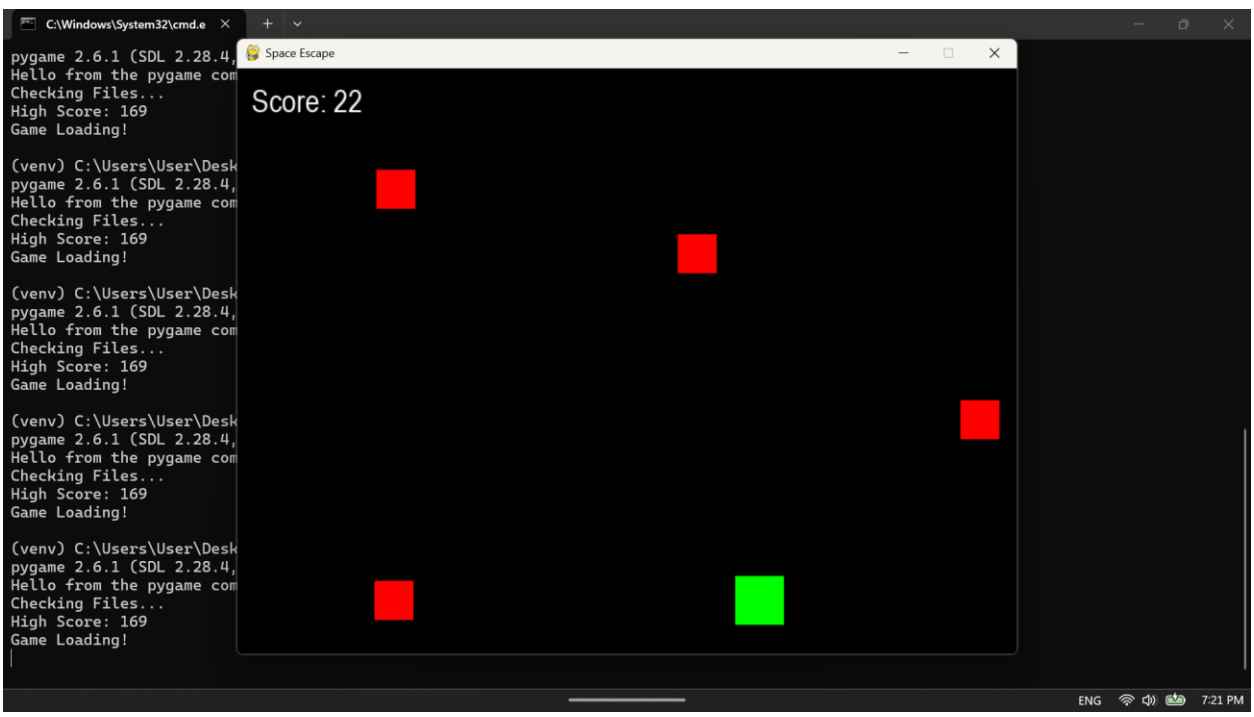

Figure 2: Gameplay in progress.

Figure 3: Game Paused screen by using press P.

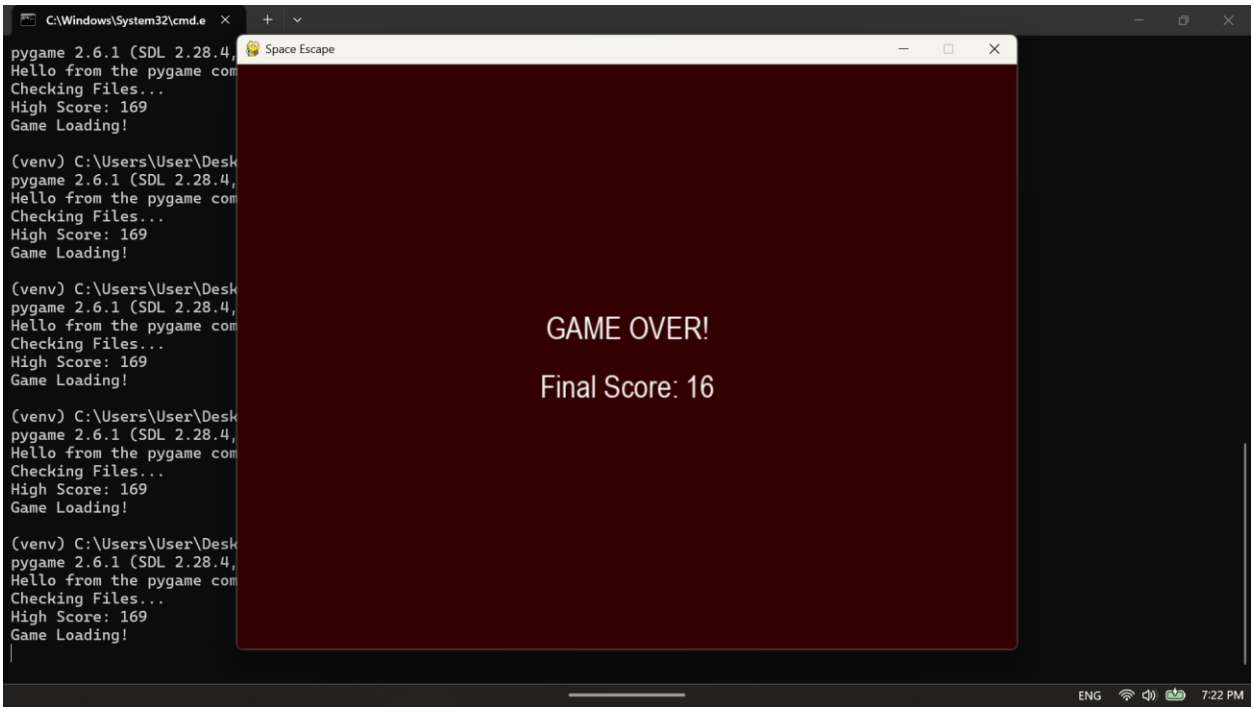

Figure 4: Game Over screen with Final Score.
